

Aminya Molly Mudlark TD

5/11/2002 - 21/6/2013

(Heelersridge foundation bitch)

Having fallen in love with our girls Ruby, Alice and Stella we decided to venture into the world of dog breeding. And as all 3 were desexed we began our search for just the right puppy to start our breeding program.

And then we found Molly.

Molly was born on a farm-stay property just west of Kempsey, NSW. Her mother "Gem" helping on the property to shift cattle. Gem was out of the last ACD Blairwick litter to be bred and her father "JC" was a retired show dog (Aust & NZ Champion) living on a property at Eungai Creek.

Molly matured into a lovely girl and produced for us some outstanding pups. Her Blairwick blood brought great strength to our lines.

Not keen on the show ring but an excellent tracking dog, a quality that she has passed to her progeny.

Molly & I had a special bond, her trust and loyalty was immeasurable.

And towards the end we both knew what was coming. I could see it in her eyes, and I'm sure she could see it in mine.

I will miss you Molly Moo . . . run free . . . and wait at the gate for me
